

Gender Pay Gap Report 2025

Under new laws, Steve Hoskin Construction Ltd as an employer with more than 250 employees is required to publish an annual Gender Pay Gap (GPG) report showing any differences in pay between male and female employees, irrespective of their role and seniority. The report is based on pay data as at 5 April 2025, referred to as the snapshot date.

The regulations require reporting on pay and bonuses as follows:

Mean (average) gross hourly rate of pay

Median gross hourly rate of pay

Proportion of male/female in hourly rate of pay quartiles (four bands)

Mean bonus pay

Median bonus pay

Proportion of male/female in receipt of bonuses, in the 12 months before the snapshot date

Relevant number of employees at snapshot date: **328**

Gender Balance

Male

95%

Female

5%

Gender Pay Gap

	Mean	Median
Steve Hoskin Construction Ltd Gender Pay Gap	10.73%	10.94%

In the Construction Sector the median gender pay gap is 17%.

Explaining our gender pay gap

Steve Hoskin Construction Ltd gender pay gap is significantly lower than the National average. However, this is not driven by unequal pay, but by the uneven split of men and women across the company and the type of roles that they do.

Like other employers in our sector, we have a greater proportion of men working in lower paid, unskilled roles, such as labourers and non-skilled site operatives, whilst some of the females occupy professional managerial roles, which require formal qualifications and experience.

Gender Bonus Gap

No bonuses were paid to any relevant employees in the reporting period.

Pay Quartiles

The proportion of males and females in each quartile pay band is as follows:

	Male %	Quartile	Female %
	94%	Lower Quartile	6%
	92%	Lower Mid Quartile	8%
	98%	Upper Mid Quartile	2%
	96%	Upper Quartile	4%
	95%	Total Employee Split	5%

The split of males and females within each of the quartiles is reflective of the predominantly male environment in which we operate.

Summary

It is well reported that the reasons behind the gender pay gap is a complex issue. Steve Hoskin Construction Ltd, as with many other companies within the construction industry has a high proportion of male employees.

Steve Hoskin Construction Ltd is aware of the need to nurture new talent and will endeavour to review processes and procedures to see what can reasonably be done to increase the number of females within the company.

We have actively been attending colleges and open events to engage with both males and females to try and encourage them to join SHC and consider a career in construction.

Monitoring and Performance

We will monitor and analyse our gender pay gap, however, we recognise that meaningful change across the industry is needed and this will take time.

Our Declaration

We confirm that our gender pay gap calculations are accurate and meet the requirements of the methodology set out in The Equality Act 2010 (Gender Pay Gap Information) Regulations 2017.

I, Neil Hoskin, Managing Director confirm that the information in this statement is accurate.
